## ROSELAND MUSICAL: PERFORMANCES JULY 2019

### GEOMETRY

New production, PREMIERE on July 2019 a [LA SALA MIGUEL HERNÁNDEZ](#)

#### Synopsis:

A circle, a square, and a triangle are the three basic figures of the variable geometry that the movement of dance transforms into dynamic and fleeting images. In this show are amplified with 3D video projections and the direct participation of the public.

‘A visual experience to enjoy a basic principle that is present everywhere: natural music and choreography, which evolve the organic essence of the form. Linear structures, circular or creating vertices where the arts come together: imaginary and fantasy of images where dancers generate predefined variations’. (Text by Jordi Sora)
